SUMMARY

From a young age, I've always been into technology. I started learning Web Development since I was 14 during my free time, and I was even hired as a Web Developer instructor within my school. As soon as I turned 17, I was able to work remotely at an Enterprise for a while until I went to college, and I have been doing small projects ever since. To the best of my abilities, I have the goal to improve people's lives with technology.

EXPERIENCE & EDUCATION

- Web Developer Instructor (2014 – 2015).**
I taught web development for a year within my own school.
- Full-Stack Intern (2015 – 2016).**
At Hi-Rez Studios. Tasked with updating components and keeping responsiveness. I was taught React, Sass, NodeJS and Stripe.
- Minor at Web Dev (2018 – 2019).**
I studied Chemical Engineering and majored in Marketing, but I also minored in Web Development.
- AI News App (2021).**
Created a React App that allows the user to navigate through several news articles using voice commands.
